R

Reca

An AI-powered WAEC/JAMB study companion — **active AI memory**, not another chatbot that waits.

Track 3 · AI for Everyday Life · Case Study 2

Talodabioluwa Paul · Folarin Oyewole

reca-study-companion.vercel.app

THE DIFFERENCE IN ONE LINE

ChatGPT waits. Reca comes first.

WhatsApp-native · explain → quiz → grade → unprompted resurface · live product

- WhatsApp-native
- Active memory
- Free stack

WHO WE BUILT FOR

After-school study on their own phone.

PRIMARY · DEMO PERSONA

Chiamaka

SS3 · 17 · WASSCE candidate · Lagos

Context: Public school. Photocopied notes + shared textbook. Studies after school on WhatsApp.

Goal: Credits in 5 subjects incl. English & Maths — proceed to university.

Frustration: Rereads for hours but can't tell what's actually sticking.

"I read it and it makes sense — but past questions, I freeze. I don't know what I don't know."

SECONDARY PERSONA

Tobi

19 · JAMB repeat candidate · part-time work

Context: Finished SS3. Retaking UTME alone — no teacher to ask.

Goal: Raise score for Computer Science at target university.

Frustration: Loses track of weak subjects as exam date nears.

"By the time I return to a topic, I've forgotten half of it and start over."

THE PROBLEM

Students study hard. Then forget what mattered.

Millions of Nigerian candidates prepare alone after school. They reread notes — but they don't know what they've actually lost until exam day.

~1.95M
WASSCE candidates — 2026 cycle

~2.24M
JAMB UTME registrations

61.5%
Credit pass incl. English + Maths — pressure, not certainty

WHY NOT "JUST USE CHATGPT"?

Passive memory is not enough.

CHATGPT / CLAUDE

- Explains when you ask
- Remembers when you return
- You open another app
- No exam-triggered follow-up

RECA

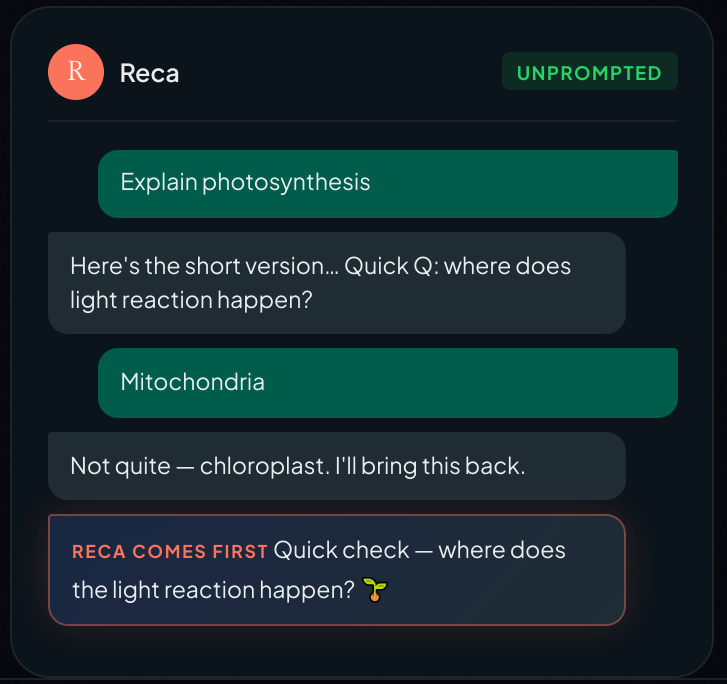

- Explain → quiz → grade
- Remembers what you got wrong
- Messages you first on WhatsApp
- WAEC/JAMB-framed practice

THE SOLUTION

Study companion that returns on its own.

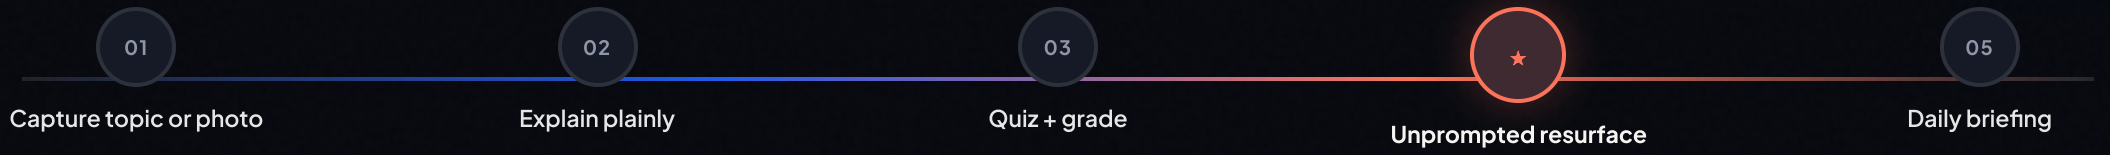

A student sends a topic or past-question photo. Reca explains in plain exam language, asks two quick questions, grades instantly — then resurfaces weak spots **unprompted**.

No new app. No dashboard homework. WhatsApp is already the habit.

FUNCTIONALITY

One loop. Built end-to-end.

Web + WhatsApp sync · Learn / Revise / Progress · 10 subjects · photo past-questions · preset curriculum fallback · shipped and live.

USE OF AI

AI that teaches — then remembers.

GENERATION

Gemini explains WAEC/JAMB topics in plain language, builds 2 practice questions, grades answers, and reads past-question photos.

MEMORY DECISION

Wrong answers schedule a follow-up. Reca decides *when* to return — the student doesn't open the chat to dig it up.

Preset curriculum bank keeps the demo reliable offline. AI is the teacher; spaced recall is the product.

BUILD STACK

What we built Reca with.

MESSAGING

Meta Business Suite

WhatsApp Cloud API — phone, OTP, unprompted resurface.

AI

Google Gemini

Explain, quiz, grade, photo past-questions.

BUILD AGENT

Antigravity

Scaffolding and shipping the product loop faster.

IDE

Cursor

UX polish, security harden, deck and handoff.

PROBLEM | AI SOLUTION | TOOLS USED | BUSINESS IMPACT

BUSINESS IMPACT

Built for how Nigerian students already study.

Everyday life means after-school phone time — not another app to install.

- ✓ After-school phone habit — not an in-school laptop fantasy
- ✓ Zero download friction on the channel they already use
- ✓ Turns "I read it" into "I still know it"
- ✓ Free-tier stack — pilot without paid infra day one

SUSTAINABILITY

Free for students. Paid where schools need visibility.

FREEMIUM

Individual students stay free — low marginal AI cost per interaction.

B2B2C

Schools & tutorial centres — cohort plans + teacher progress view.

SPONSORED

NGOs, telcos, exam-prep brands subsidise public-school access.

Moat: attempt history + WhatsApp distribution + WAEC/JAMB curriculum — not another generic chat.

TRY IT NOW

Watch the aha moment.

Web companion runs the same memory loop. WhatsApp is the stage hero — Reca messages first.

https://reca-study-companion.vercel.app/signup.html

Demo script: Explain photosynthesis → wrong Q1 (mitochondria) → unprompted resurface → chloroplast. Guest mode available.

BUILT IN TWO DAYS

Who built Reca.

PRODUCT DESIGN & UX

Talodabioluwa Paul

Experience, copy, flows, and the student-facing product system.

ENGINEERING & WHATSAPP

Folarin Oyewole

Backend, Meta Cloud API, memory loop, and deploy.

AI BuildFest 2026 · Track 3 · Case Study 2 · Participant ID **BF-0933**

THE ASK

Pilot with real students. Keep coming first.

NOW

Working loop on WhatsApp + web. Live link ready for judges.

NEXT 90 DAYS

2–3 school pilots · teacher progress view · broader WAEC coverage.

The ask: recognition and support to pilot Reca with real students for the next WAEC/JAMB cycle.

QUESTIONS WELCOME

ChatGPT waits. Reca comes first.

An AI-powered WAEC/JAMB study companion — active AI memory, not another chatbot that waits.
